

Debris Management

I. Purpose

To describe how debris clearance will be accomplished following a disaster in the City of Jordan.

II. Responsibilities

Within the City of Jordan, the Public Works Director will be responsible for debris clearance. Storage may be accomplished at the Public Works facility or possibly in one of the local parks or other designated storage area (dependant on the product to be stored).

III. Policies and Procedures

- A. Except in unusual circumstances, removal of debris from private property will be the responsibility of the property owner, with oversight by the City of Jordan.
- B. The Scott County Mutual Aid Cities, and possibly MnDOT, will be asked to assist Jordan with debris clearance under the following conditions: When local equipment is not adequate to handle removal, particularly on major transportation routes, either because of size or timeline considerations.
- C. The cleanup and disposal of spilled or leaked hazardous materials will be the obligation of the responsible party under the supervision of the Jordan Fire Department.
- D. Disposal of Carcasses. Assistance will be required of an outside agency.
- E. In the event that public debris collection and storage locations are developed and the removal of the debris is contracted, FEMA requires that the debris be weighed at the collection site and after it has been transported to the collection facility. Portable scales will need to be utilized if practical.

IV. Supporting Documents

- A. A listing of the major private construction contractors (which have debris removal equipment) in the City of Jordan should be maintained by the City Public Works Director.

- B. A listing of hazardous materials clean-up contractors and storm damage contractors will be maintained by the Public Works Director.
- C. Written (or non-written) debris clearance agreements exist with neighboring communities.
- D. The Storm Damage Clean-up Policy is maintained by the Public Works Director.
