

Permit # _____

LANDSCAPE ESCROW REQUIREMENTS FOR NEW RESIDENTIAL CONSTRUCTION

- ❑ Yards must be final graded and sodded or seeded completely (please check covenants). If seeded, the seed must have taken root over the entire yard and boulevard area.
- ❑ Parking within the front yard shall be on an improved driveway consisting of concrete, brick pavers or asphalt-bituminous pavement.
- ❑ A tree must be planted within the front yard setback area outside of the drainage and utility easements and shall be of a disease-free species approved by the City. The deciduous tree must measure at least 2 inches in diameter as measured six inches off the ground.
- ❑ Retaining walls: Some housing developments within Jordan have lots which might benefit from the installation of retaining walls. Should you consider constructing a retaining wall, please check with the City prior to construction to determine that your retaining wall will not be located on top of a drainage/utility easement or whether a permit is required.

The City of Jordan requires all new residential construction permits to submit a landscape escrow when a building permit is issued in the amount of \$2,500.00. Boulevard trees installed by developers does not meet landscaping escrow requirements and no trees, plants or shrubs may be planted in the public right-of-way or drainage and utility easements.

As stated in the City Code, required yards and setback areas, except driveways and areas used as a garage or accessory building shall be graded to final elevations and sodded or seeded and landscaped with trees and shrubs within 90 days* after the Certificate of Occupancy is issued. Escrow funds shall be forfeited if the work is not complete within 120 days after the Certificate of Occupancy is issued. Once the property owner or builder has completed all landscaping requirements, an inspection must be scheduled by calling **City Hall at (952) 492-2535**. The building inspector and planning staff will conduct the landscaping inspection. **In addition to the landscape inspection, the permittee must also submit an as-built survey to the City, indicating the property has been graded to the approved plans.** Following staff approval and submittal of the as-built survey, the City Council will then consider final approval at the next regularly scheduled meeting and a check will be issued to the appropriate party if all of the requirements are met.

Address of Property: _____

* If a certificate of occupancy is issued between the months of November and April 15, the 90-day period shall begin to run on April 15

Please fill out the name and address of the person/firm who should receive the landscape escrow refund when all of the above requirements have been met. Please submit this written form with the building permit application.

Name: _____
Address: _____
Signature: _____ Date: _____

It is the applicant's responsibility to inform the City of any changes in the name or address of the person receiving the landscape escrow return.

Welcome to Our Community!

We are so glad you decided to become a part of our community! As a homeowner in a new development, it is a requirement of the City and an agreement with the developer of your neighborhood to require certain tree plantings. This is to sustain a healthy environment and a visually pleasing atmosphere. Your developer is required to provide boulevard trees of a certain size.

Homeowners are required to plant a 2-inch caliper tree in the front yard. The clump size equivalent to a 2" caliper tree needs be at least 8' tall. Your tree needs to be planted within the front yard setback area, outside of the drainage and utility easement, and preferably on the same side of the driveway as the front door without blocking visibility at maturity. Call Gopher State One-Call before digging. You can reach Gopher State at (651) 454-0002.

Following is a list of acceptable varieties to assist you when visiting nurseries for your selection.

Shade Varieties

Quaking Aspen	Ironwood
Blue Beech	Linden
Buckeye	Numerous Varieties of Maple
Northern Catalpa	Numerous Varieties of Oak

Attention New Commercial Water Customer:

The City of Jordan would like to inform you of an available option. Currently, the amount of sewer usage is calculated as the same amount as your water usage. According to the City Code, "If a person feels that a significant amount of metered water does not reach the sanitary sewer, he/she can, at his/her own expense, with approval of the City, install such additional meters or metered services as are necessary to calculate the volume of water not discharged to the sanitary sewer. Metered water not discharged to the sanitary sewers shall not be subject to sewer service charges. Requests to install additional meters must be made in writing to the City."

Sincerely,

The City of Jordan
