Attention New Commercial Water Customer:

The City of Jordan would like to inform you of an available option. Currently, the amount of sewer usage is calculated as the same amount as your water usage. According to the City Code, “If a person feels that a significant amount of metered water does not reach the sanitary sewer, he/she can, at his/her own expense, with approval of the City, install such additional meters or metered services as are necessary to calculate the volume of water not discharged to the sanitary sewer. Metered water not discharged to the sanitary sewers shall not be subject to sewer service charges. Requests to install additional meters must be made in writing to the City.”

Sincerely,

The City of Jordan
