

Press Release | June 24, 2021

## US 169 / TH 282 / CSAH 9 Interchange in Jordan Listed on Final State Transportation Bill

**June 24, 2021, Jordan, MN** – The City of Jordan and Scott County’s partnership project for a new interchange at US 169 / TH 282 / CSAH 9 has been listed in the Transportation Omnibus Bill approved today by the State Senate. Jordan and Scott County are represented by Senator Eric Pratt in that chamber of the Minnesota Legislature. The bill slates \$2.5M in state funding for work to begin on final design of these long-desired improvements.

By removing the last signalized intersection along US 169 within 75 miles, the project will improve connectivity; reduce delay, congestion, and emissions; and make safer multimodal connections in the southwest Twin Cities region. Proposed improvements will minimize business transportation costs and enhance Minnesota’s economic competitiveness. At the same time, these improvements will make the highway safer by eliminating an intersection with one of the highest crash rates statewide, and two intersections that have a crash frequency higher than the statewide average.

*Rendering of the proposed interchange, looking north along TH 282 crossing over US 169 in the City of Jordan*

The City of Jordan is excited by the development and looks forward to the bill being signed into law. For more information regarding today’s action, please visit the following site:
